4 registered company so stating. The registered company shall have 30 days from the receipt
5 of the notice to bring such property into compliance, and it shall submit a new original
6 report or completion notice or both and an inspection fee of not more than one hundred
7 twenty-five dollars (\$125) for each property inspected. If a subsequent reinspection is
8 necessary, pursuant to the board's review of the new original report or notice or both, a

24 (b) No registered company or licensee shall commence work on a contract, or sign,
25 issue, or deliver any documents expressing an opinion or statement relating to the absence
26 or presence of wood destroying pests or organisms until an inspection has been made by a

28 or upon which work is completed shall be reported on a form prescribed by the board and
shall be filed with the board no later than 10 business days after the commencement of an

9 (7) Information regarding the substructure, foundation walls and footings, porches,
10 patios and steps, air vents, abutments, attic spaces, roof framing that includes the eaves,
11 rafters, fascias, exposed timbers, exposed sheathing, ceiling joists, and attic walls, or other
12 parts subject to attack by wood destroying pests or organisms. Conditions usually deemed
likely to lead to infestation or infection, such as earth-wood contacts, excessive cellulose
13 debris, faulty grade levels, excessive moisture conditions, evidence of roof leaks, and
insufficient ventilation are to be reported.

14 (10) Recommendations for corrective measures.

15 17. Section 8518 of the Code states, in pertinent part:

26 issued. Each registered company having a branch office or more than one branch office
shall be required to display its branch office registration prominently in each branch office
it maintains.

27 When a registered company opens a branch office it shall notify the registrar in
28 writing on a form prescribed by the board and issued by the registrar in accordance with
rules and regulations adopted by the board. The notification shall include the name of the

3 19. Code section 8638 states:

4 Failure on the part of a registered company to complete any operation or construction
5 repairs for the price stated in the contract for such operation or construction repairs or in
6 any modification of such contract is a ground for disciplinary action.

7 20. Code section 8639 states:

8 Aiding or abetting an unlicensed individual or unregistered company to evade the
9 provisions of this chapter or knowingly combining or conspiring with an unlicensed
10 individual or unregistered company, or allowing one's license or company registration to be
11 used by an unlicensed individual or unregistered company, or acting as agent or partner or
12 associate, or otherwise, of an unlicensed individual or unregistered company to evade the
13 provisions of this chapter is a ground for disciplinary action.

14 21. Code section 8641 states:

15 Failure to comply with the provisions of this chapter, or any rule or regulation
16 adopted by the board, or the furnishing of a report of inspection without the making of a
17 bona fide inspection of the premises for wood-destroying pests or organisms, or furnishing

34 Regulations.

35 25. California Code of Regulations, title 16, section 1990, states, in pertinent part:

36 (a) All reports shall be completed as prescribed by the board. Copies filed with the board

1 shall be clear and legible. All reports must supply the information required by Section 8516
2 of the Code and the information regarding the pesticide or pesticides used as set forth in
3 Section 8538 of the Code, and shall contain or describe the following:

4 (3) Infestations, infections or evidence thereof.

5 (4) Wood members found to be damaged by wood destroying pests or organisms.

6 (b) Conditions usually deemed likely to lead to infestation or infection include, but are not
7 limited to:

8 (2) Inaccessible subareas or portions thereof and areas where there is less than 12 inches
9 clear space between the bottom of the floor joists and the unimproved ground area.

10 (3) Excessive Cellulose Debris. This is defined as any cellulose debris of a size that can be
11 raked or larger. Stumps and wood imbedded in footings in earth contact shall be reported.

12 (4) Earth-wood contacts.

13 (5) Commonly controllable moisture conditions which would foster the growth of a fungus
14 infection materially damaging to woodwork.

15 (d) Even though the licensee may consider the following areas inaccessible for purposes of
16 inspection, the licensee must state specifically which of these areas or any other areas were
17 not inspected and why the inspection of these areas is not practical: furnished interiors;
18 inaccessible attics or portions thereof; the interior of hollow walls; spaces between a floor
19 or porch deck and the ceiling or soffit below; stall showers over finished ceilings; such
20 structural segments as porte cocheres, enclosed bay windows, buttresses, and similar areas
21 to which there is no access without defacing or tearing out lumber, masonry or finished
22 work; built-in cabinet work; floors beneath coverings, areas where storage conditions or
23 locks make inspection impracticable.

24 (f) The following language shall appear just prior to the first finding/recommendation on
25 each separated report:

26 "This is a separated report which is defined as Section I/Section II conditions evident on the
27 date of the inspection. Section I contains items where there is visible evidence of active
28 infestation, infection or conditions that have resulted in or from infestation of infection.
Section II items are conditions deemed likely to lead to infestation or infection but where
no visible evidence of such was found. Further inspection items are defined as
recommendations to inspect area(s) which during the original inspection did not allow the
inspector access to complete the inspection and cannot be defined as Section I or Section
II."

29 26. California Code of Regulations, title 16, section 1991, states, in pertinent
30 part:

31 (a) Recommendations for corrective measures for the conditions found shall be made as

34 applicable local building code, and shall accomplish the following:

2 reinforced. Structural members which are structurally weakened by fungus to the point
3 where they no longer serve their intended purpose shall be removed or, if feasible, may
4 remain in place if another structural member is installed adjacent to it to perform the same
5 function, if both members are dry (below 20% moisture content), and if the excessive
6 moisture condition responsible for the fungus damage is corrected. Structural members
7 which appear to have only surface fungus damage may be chemically treated and/or left as
8 is if, in the opinion of the inspector, the structural member will continue to perform its
9 originally intended function and if correcting the excessive moisture condition will stop the
10 further expansion of the fungus.

11 (8) Exterminate all reported wood-destroying pests. Such extermination shall not be
12 considered repair under section 8516(b)(12) of the code. If evidence indicates that wood-
13 destroying pests extend into an inaccessible area(s), recommendation shall be made to
14 either:

15 (A) enclose the structure for an all encompassing treatment utilizing materials listed in
16 Section 8505.1 of the code, or

17 (B) use another all encompassing method of treatment which exterminates the infestation

20 1. exposing the infested area(s) for local treatment,

21 2. removing the infested wood,

22 3. using another method of treatment which exterminates the infestation. (If any
23 recommendation is made for local treatment, the report must contain the following
24 statement: "Local treatment is not intended to be an entire structure treatment method. If
25 infestations of wood-destroying pests extend or exist beyond the area(s) of local treatment,
26 they may not be exterminated.")

27 When a complete inspection is performed, a recommendation shall be made to remove or
28 cover all accessible pellets and frass of wood-destroying pests.

When a limited inspection is performed, the inspection report shall state that the inspection
is limited to the area(s) described and diagrammed. A recommendation shall be made to

areas. The limited inspection report shall include a recommendation for further inspection
of the entire structure and that all accessible evidence of wood-destroying pests be removed
or covered.

(9) For the extermination of subterranean termite infestations, treat an infested area under
the structure when subterranean termite tubes are found connected to the ground or when
active infestations are found in the ground. Subterranean termite tubes shall be removed
where accessible, except where a licensee is using an above ground termite bait station that
requires the use of the termite tubes to be effective. Where a licensee is using an above
ground termite bait station that requires the use of termite tubes to be effective,
subterranean termite tubes can remain in place for the duration of the licensee's use of the
termite bait stations. At the conclusion of the treatment, the subterranean termite tubes shall
be removed.

(12) Repair a stall shower if it is found to leak when water tested for a minimum of
fifteen (15) minutes after the shower drain has been plugged and the base filled to within
one (1) inch of the top of the shower dam. Stall showers with no dam or less than two (2)
inches to the top of the dam are to be water tested by running water on the unplugged
shower base for a minimum of five (5) minutes. Showers over finished ceilings must be

1 inspected but need to be water tested. If water stains are evidence on the ceiling,
2 recommendations shall be made for further inspection and testing.

3 27. California Code of Regulations, title 16, section 1993, states, in pertinent
4 part:

6 of the code. All reports must be on the form prescribed by the board.

7 (d) A supplemental report is the report on the inspection performed on inaccessible areas
8 that have been made accessible as recommended on a previous report. Such report shall
9 indicate the absence or presence of wood-destroying pests or organisms or conditions
10 conducive thereto. This report can also be used to correct, add, or modify information in a
11 previous report. A licensed operator or field representative shall refer to the original report
12 in such a manner to identify it clearly.
