Licensee participation needed for Branch 1 Operator and Field Representative Occupational Analysis Survey

If you are a Branch 1 licensee in California, the Structural Pest Control Board (SPCB) of California needs your participation in an analysis of professional Branch 1 Operator and Field Representative work.

The SPCB will be kindly asking you to complete an online Occupational Analysis (OA) Survey questionnaire. The OA Survey questionnaire is part of the analysis conducted by the Department of Consumer Affairs’ Office of Professional Examination Services (OPES) at the request of SPCB. Information about the OA questionnaire, including instructions on how to access it online, has been sent out by both email and mail on February 14th, 2019.

The purpose of this project is to develop a description of the profession in terms of the tasks and knowledge that must be mastered to practice safely and competently to protect consumers. The results of the OA will be used to help ensure that licensing examinations accurately assess what Branch 1 Operators and Field Representatives do while performing their work and what knowledge they require.

Your participation and the information you provide on current professional practice will ensure that the results of the OA accurately reflect the most current and pertinent tasks and knowledge required of an individual entering the field.

SPCB greatly appreciates your willingness to participate in this important project.
